

**MONTHLY WEATHER REVIEW - ARMIDALE NSW**  
**DECEMBER 2023**

December 2023 was a warm partly cloudy month with well above average rainfall.

The total rainfall of 129.2 mm was 40 mm higher than the average with the majority of the rain (110 mm) falling in the second half of the month as a result of a number of low pressure troughs developing over inland New South Wales. Thunderstorms contributed to the rainfall total with storms on 10 days. The highest daily fall was 43.4 mm on the 20th.

Overnight temperatures were slightly higher than normal, but day temperatures were significantly higher than the long term average. It was particularly warm from the 5th to the 18th with maximums reaching or exceeding 30.0C on 12 days (long term average 4 days). There were no notable extremes.

Winds were predominantly light to moderate westerlies, and there was one fall of hail during a thunderstorm on the 25th.

There were no noteworthy events.
